### **Testimonial of Man3000 services**

Koogan Plastics has been using the Man3000 DHS web-based solution for over two years. I am happy to report that within the first couple of months we started to see savings on our telephone expenditure and we are now saving roughly 35% of our original telephone bill every month.

The system has also helped us to successfully investigate and resolve several incidents at the workplace, as the call records are easily accessible online, in a user-friendly format.

I would also like to commend Man3000 for their customer service and support. Most issues and queries were resolved over the phone fairly quickly, and for the few issues that could not be resolved immediately, I was contacted by the Man3000 team within a day or two with a solution. They have also showed willingness to modify and improve the system based on our own requests, and are also constantly improving on the Man3000 DHS product, which keeps getting better and more user-friendly with every update.

I would highly recommend Man3000 to companies looking to manage and take control of their telephone usage spend in an easy, efficient and very effective way, while improving employee productivity and cutting down on abuse.

Kind Regards

**Saajid Ismail**
