RE: TESTIMONIAL LETTER

To whom it may concern,

Ample Insurance Brokers and MAN3000 go back many years. We have previously used the buffer box on our physical PABX together with the desktop software to obtain call detail which worked very well.

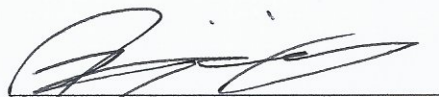

Earlier in the year of 2017 a new VoIP telephone system was embraced. This system came with a lot of promises but unfortunately the promise of proper reporting did not realise.

MAN3000 was approached with our reporting requirements and the solutions they provided exceeded our expectations. Not only can we obtain on demand- and scheduled reports from the website, we can also get real time call information in machine readable format via their customised desktop software. This is tremendous as we import all call details into our CRM system. The MAN3000 system integrated with the VoIP system perfectly.

MAN3000 really came to the party with their solutions. It is a pleasure working with such knowledgeable, quick thinking staff and their turnaround time is of the very best.

Thank you MAN3000 for enabling us with excellent real time call information and for your excellent service. You guys are the best and I would recommend your services to any company.

Sincerely,

Riaan Leiding  
IT Manager
